One of the Brilliant Events of the Sea

The charming recital given at the residence of Mrs. Edwin F. Uhl last night formed a fitting close to the brilliant season of musical activity which has made the past winter so en-joyable to local artists and patrons of

The program of ten numbers was most happily selected and was rendered smoothly and conscientiously. Nearly 125 people filled the beautiful drawing rooms, and that they listened with rapt attention to all numbers is a tribute to the artists. The proceeds of the affair, about \$75, will be devoted to the work of St. Mark's hospital.

Living Waters of Reed's Lake.

In their present completeness of equipment and thorough overhauling the familiar steamers, Belkinap and Trixie, are among the swiftest and staunchest craft that ply any inland waters of the state of Michigan.

The McCarthys, father and son, captains respectively of the Belkinap and Trixie, are experienced steamboat men, having a general knowledge of the requirements of safe navigation and a particular knowledge of the geography of the waters they navigate. In their newly fitted and perfectly equipped condition these well-known and popular boats are in better shape than ever before to carry tourists about the lake. Recently the official inspector of marine craft and boilers visited the Belkinap and made an official examination of her condian official examination of her condi-tion. It was found that she is in su-perb condition, and certificates of her

perb condition, and certificates of her perfect seaworthmess are now framed and adorn her cabin walls.

An especial effort has always been made by the McCarthys to entertain families and picnic parties. To this end especial favors have always been extended and especial rates rates made whereby groups and gatherings of friends visiting the lake for recreation and refreshment have found their pleasure greatly enhanced. The McCarthys now have the exclusive use of the main pavilion. Their boats are always ready and their officers always gentlemanly and agreeable.
